

## Military Operations Analyst

### E3R Opportunity, San Diego, CA; Military Operations Analyst

#### Job Description:

E3R is seeking an experienced Military Operations Analyst to support Department of Defense and Test Resource Management Center (TRMC) contracts focused on technology transition, experimentation, and operational fielding. This role provides critical warfare analysis, mission engineering, and subject matter expertise to inform weapon system modeling, experimentation design, and warfighting capability assessments. The analyst will also serve as a Joint Mission Integration and Experimentation (JMIE) range operations project officer, collaborating with stakeholders across all warfighting domains to define requirements, execute experiments, and deliver actionable analysis that supports senior DoD decision-makers.

#### Functional Description:

- Lead advisor to DoD program managers for the evaluation and transition of advanced warfighting tools and technology
- Engage DoD stakeholders to support multi-domain constructive, virtual, and live experimentation of advanced warfighting capabilities
- Technical and operational advisor in one or more key warfare areas/domains
- Analyze science and technology capability lifecycles and transition of capability
- Collect, complete, organize and interpret technical data and information
- Develop and analyze experimentation project status, schedules, and milestones
- Operational support to specified experiments and program integration testing
- Integrate technical, operational, and programmatic aspects across various elements to achieve program objectives
- Provide model and employment behavior to support large scale constructive environment
- Evaluator of Tactics, Techniques, and Procedures in cutting-edge warfare environments

#### Desired Knowledge, Skills, Abilities:

- At least five years of experience in a multi-level security environment
- Minimum of 15 years of experience relevant to military operations and associated technologies within one or more key warfare areas, with demonstrated proficiency in operational and technical analysis of U.S. and adversary CONOPS; Tactics, Techniques, and Procedures
- Experience leading and managing teams to solve complex technical, management, and administrative problems.
- Demonstrated ability to conduct research and analysis to reach defensible conclusions using incomplete information, to develop well-written analytic products to inform decision making, and to present analytic results orally
- Excellent interpersonal communication skills
- Proficient with Microsoft Office (Outlook, Word, Power Point, and Excel)
- Efficient and accurate work output
- Good documentation, writing, and reporting skills
- Must be self-starter, able to take initiative, work independently and recognize management issues that need to be elevated
- Must be able to multi-task and maintain deadline punctuality during pressurized situations
